

SUMMARY

I am a Data Analyst with a background in Information Systems and hands-on experience in dashboard development, business reporting, and data analysis. Skilled in Excel, SQL, Power BI, and Looker Studio to support data driven decision making and performance monitoring. Detail-oriented and adaptable, eager to contribute to analytical initiatives while continuously growing in a collaborative and forward-thinking environment.

WORK EXPERIENCES

FWD Insurance Indonesia

Nov 2025 – May 2026

Agency Strategy (Data Analytics & Reporting) - Internship

- Managed tracking and reporting for 4 monthly and 9 quarterly agency contests, delivering accurate and timely insights to the Head of Agency Strategy and 7 Business Development Managers (BDMs)
- Developed and maintained 6 Power BI dashboards covering agency performance KPIs, submission and issuance performance, agent persistency, monthly contests, and quarterly contests, reducing manual reporting effort and improving reporting efficiency
- Analyzed agency sales performance trends across 8 agency groups, 7 BDMs, and 2 types of agent hierarchy structures by consolidating and processing over 400,000 records from 6 data sources on a regular basis to support performance evaluation and data-driven decision making
- Collaborated with 5+ stakeholders from cross-functional teams to provide data support for 3 agency events

Dreamaxtion

Jun 2025 – Sep 2025

Frontend Developer - Freelance

- Developed and maintained employee attendance management systems supporting attendance tracking, leave management, and reporting processes
- Collaborated with stakeholders to translate business requirements into functional web solutions
- Integrated REST APIs and validated operational data to ensure system reliability and data accuracy
- Improved user experience through optimized workflows, form validation, and error handling

PUSDATIN Kemendikdasmen RI

Sep 2024 – Nov 2024

Frontend Developer - Internship

- Developed and deployed an AI-powered chatbot application using Next.js, LangChain, and Google Gemini API
- Implemented vector search using FAISS to improve response latency by 50%
- Collaborated in designing knowledge retrieval workflows and data indexing mechanisms
- Managed deployment and server configuration on a VPS to ensure application availability and stability

PROJECTS

Analytix App – PHKM Project

Jul 2024

- Group project to develop an app for testing machine learning models focused on supervised learning, built using Python with libraries such as Streamlit, Pandas, NumPy, scikit-learn, and Matplotlib
- Contributed as a Project Manager to guide the project direction according to human resources and app objectives
- Resolved version control issues caused by deprecated Python functions and library incompatibilities
- Provided features for users such as EDA automation, data cleaning, data encoding, and data normalization

- Performed end-to-end data analysis using SQL BigQuery, Excel, and Looker Studio to identify key sales performance issues
- Applied Root Cause Analysis (Issue Tree, 5 Whys) to uncover business problems and generate actionable recommendations
- Developed interactive dashboards to communicate insights and support decision-making

Bike Sharing Data Analysis – Dicoding Final Project

December 2023

- Analyzed 17,000+ records using Python (Pandas, Matplotlib) to identify trends in bike-sharing usage based on weather and seasonality
- Built an interactive Streamlit dashboard to visualize insights and improve interpretability of data findings

EDUCATION

Universitas Mercu Buana – Information Systems – GPA 3.91

Sep 2021 – Jan 2025

- Participated in the Talent Scouting Academy program by KOMINFO to study Oracle Database Design & Programming
- Participated in the Talent Scouting Academy program by KOMINFO to study Oracle Java Programming
- Participated in an independent study (MSIB Batch 6) with PT. Revolusi Cita Edukasi (Revou)
- Awarded as the Winner of the Pameran Hasil Karya Mahasiswa (PHKM) at Mercu Buana University as a Project Manager, developing the Analytix website as a playground for data scientists focused on supervised machine learning

Revou – Data Analytics & Software Engineering – Final Score 94/100

Feb 2024 – Jun 2024

- 5 months of data analytics & software engineering course studying Data Analysis Lifecycle and Website Development
- Awarded for achieving the highest team score on the Capstone Project, earning a perfect score of 100

CERTIFICATIONS

- Belajar Dasar Data Science (Dicoding Indonesia)
- Dasar Structured Query Language (SQL) (Dicoding Indonesia)
- Memulai Pemrograman dengan Python (Dicoding Indonesia)
- Belajar Analisis Data dengan Python (Dicoding Indonesia)
- Belajar Machine Learning untuk Pemula (Dicoding Indonesia)
- Database Design Course (Oracle Academy)
- Database Programming with SQL Course (Oracle Academy)
- Learn Data Analytics & Software Development (Revou)

ORGANIZATION EXPERIENCE

TREASURER – UMB Volleyball Club

Aug 2022 – Sep 2023

- Managed and recorded all financial transactions for the Mercu Buana Volleyball Club
- Created budget plans for events and coordinated fund allocation to support training, competitions, and club activities

SKILLS & TOOLS

Technical Skills : Data Analysis, Business Intelligence, Data Visualization, KPI Monitoring, Dashboard Development**Soft Skills** : Teamwork, Problem Solving, Adaptability, Critical Thinking**Tools** : Microsoft Excel, SQL, Google BigQuery, Power Bi, Looker Studio
